About IAGLR

The International Association for Great Lakes Research (IAGLR) is a scientific organization made up of researchers studying the Laurentian Great Lakes, other large lakes of the world, and their watersheds, as well as those with an interest in such research. Specifically, we

- promote all aspects of large lakes research; and
- communicate research findings through publications and meetings.

To support these objectives, we engage in three main activities every year:

- We hold an Annual Meeting and Conference
- We publish the *Journal of Great Lakes Research*
- We give out Scholarships and Awards
